

## What's Missing: Measurable Annual Goals

1. Given a set of behavior intervention strategies, Joey will comply with his teacher's request using no more than 2 prompts with 75% accuracy as measured by teacher observation.

**What is missing?**

---

---

---

---

**Rewrite the goal using the MAG grid provided:**

---

---

---

---

2. Given a variety of teaching strategies, Derek will improve his math calculation skills as measured by classroom work samples and teacher-made tests.

**What is missing?**

## What's Missing: Measurable Annual Goals - Answers

1. Given a set of behavior intervention strategies, Joey will comply with his teacher's request using no more than 2 prompts with 75% accuracy as measured by teacher observation.

**\*\*What does Joey need to comply with in order to meet this goal?**

**\*\*Give some examples of the behavior intervention strategies (i.e. Social Stories, visual cues, etc.)**

*Given a set of social stories, visual cues, and a choice of learning activity, Joey will remain on task and attentive to his teachers' request for 10 minutes on 3 out of 4 observed opportunities with 75% accuracy as measured by teacher observation and data collection.*

2. Given a variety of teaching strategies, Derek will improve his math calculation skills as measured by classroom work samples and teacher-made tests.

**\*\*Specific examples of teaching strategies will be used to implement this goal.**

**\*\* How often is this goal going to be measured?**

**\*\* What is the level of mastery that Derek needs to reach?**

*Given the use of manipulatives, touch math, and other research-based teaching strategies, Derek will improve his math calculation skills by one grade level with 80% percent accuracy as measured by teacher-made tests, standardized tests, and data collection on 4 out of 5 observed opportunities.*

### What's Missing: Measurable Annual Goals

3. Given a planner, Beth will keep track of her classroom assignments and due dates as measured by teacher observation.

What is missing?

---

---

---

---

Rewrite the goal using the MAG grid provided:

---

---

---

---

4. Given multiple opportunities for social interaction, Patricia will improve her conversational skills with 80% accuracy as measured by teacher observation and data collection.

What is missing?

### What's Missing: Measurable Annual Goals - Answers

3. Given a planner, Beth will keep track of her classroom assignments and due dates as measured by teacher observation.

**\*\* What is the level of mastery that Beth needs to reach to meet this goal?**

**\*\*Needs a more detailed method for measuring progress.**

*Given a planner and visual and verbal prompts from her teachers, Beth will write down all of her assignments and due dates to avoid missing assignments with 90% accuracy on 9 out of 10 observed opportunities as measured by teacher observation and data collection.*

4. Given multiple opportunities for social interaction, Patricia will improve her conversational skills with 80% accuracy as measured by teacher observation and data collection.

**\*\* Specific examples of conversational skills that need to be addressed (conversational turn-taking, beginning, maintaining, and ending conversations, having conversations about non-preferred topics)**

**\*\*How often does Patricia need to correctly demonstrate her conversational skills to show mastery (i.e., 3 out of 4 observed opportunities)?**

*Given multiple opportunities for peer interactions in her general education environment, Patricia will improve her ability to start and end a conversation appropriately as well as maintain a conversation with her peers about a non-preferred topic with 70% accuracy on 7 out of 10 observed opportunities as measured by data collection and teacher observations.*
