Are you a parent/caregiver of an adolescent with dyslexia?

The research study:

This research study consists of one brief online questionnaire that takes approximately 6 minutes to complete.

Who do we need?

Each participant must be a parent/caregiver of an adolescent aged 11-17 with diagnosed dyslexia. Parents/caregivers may include biological parents, adoptive parents, foster parents, and legal guardians. The adolescent's diagnosis must have been made by a qualified professional and may have been made prior to age 11. Each participant must speak English, though they may speak additional languages.
